DETAILED ACTION

Allowable Subject Matter

1. Claim 3 is allowed. The following is an examiner's statement of reasons for allowance: The prior art of records does not teach or suggest the limitations "the temperature that measures a temperature of the light emitting element and a pulse width correction circuit for varying, according to a measured temperature, a pulse width of a light on/off signal to be supplied to the modulator" in claim 3. The closest prior art, Tahara et al. (US 5,548,435) discloses optical transmitter and Miyazaki et al. (US 6,040,931) disclose optical transmitter, terminal station apparatus having the optical transmitter, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- a. Tahara et al. U.S. patent no. 5,548,435. Optical Transmitter
 - b. Yoshie U.S. patent no. 6,353,358. Optical transmitter, terminal station apparatus having the optical transmitter
